

Water-cooled video probes

Field of View

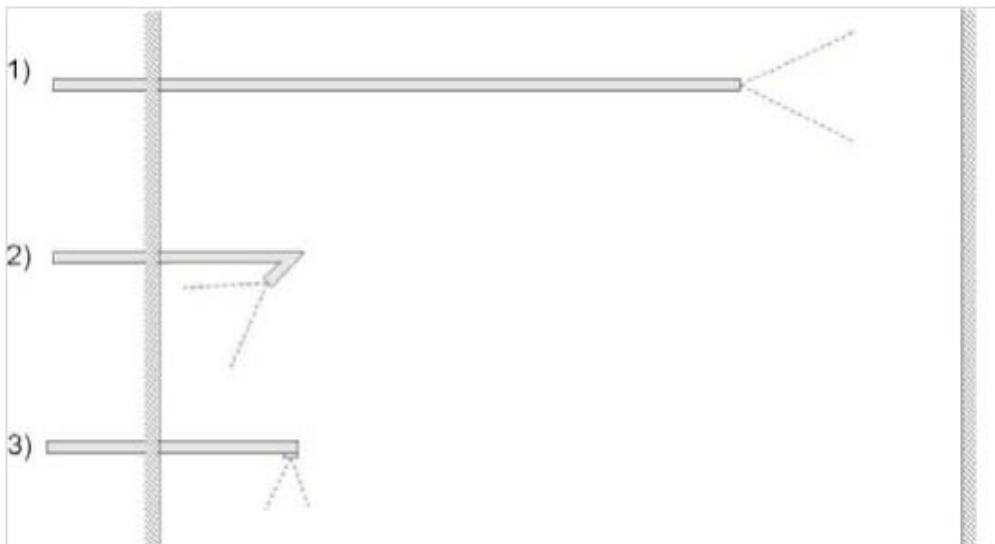

Figure 1 1) Long water-cooled video probe (up to 9 m) with field of view forward, 2) field of view of video camera backwards (to see slag deposits at burner) and 3) tilted field of view. Probe diameters typical 22-60.3 mm.

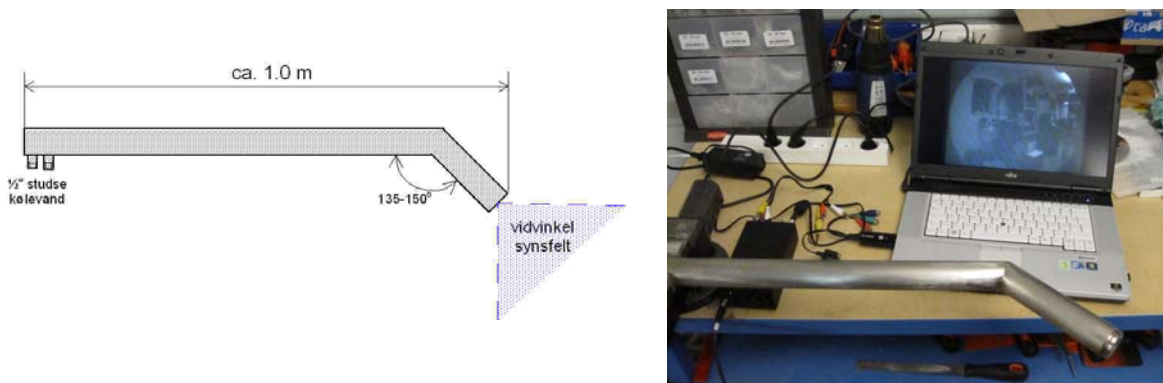

Figure 2 Popular simple water-cooled video probe with (tilted view) or without bend (looking forward) of probe. Probe diameters 22 mm, 32 mm, 45 mm or custom (e.g. 12 mm).
